

# THE THREE LAWS OF BIOMETRICS

## Policy

comes first:

Any use of biometrics is necessary and proportionate, with basic human rights, ethics and privacy at its heart.

**1  
POLICY**

**TRUST**

**2  
PROCESS**

## Process

follows policy:

Safeguards are in place to ensure decisions are rigorously reviewed, operations are fair, equity and inclusion are addressed, and operators are accountable.

**3  
TECHNOLOGY**

## Technology

guided by policy and process:

Know your algorithm, biometric system, data quality and operating environment and mitigate vulnerabilities, limitations and risks.

*Lifecycle of system*
